

Testimonials - PA in Process Seminar Series

Ann,

Can you please pass on my thanks and appreciation to all the speakers and hosts Endress & Hauser for the most informative and enjoyable seminar that I attended recently at Endress & Hauser (6 March 08)

I will certainly be recommending any future seminars by yourselves to my work colleagues and will be investigating MMU courses on the subject.

Best Regards,

Glyn Shawcross.

From: Davis, John [mailto:John.Davis@uuia.co.uk]

As a totally unbiased member of the audience I can say that it was an excellent day, well received by the participants that I managed to speak to during the lunch break. The day certainly stimulated more discussions within my team of guys who attended. Especially in the area of PA profiles and the EDD – DTM battleground.

Well done to all presenters and those who made it happen.
